Chief Complaint & HPI

Reason for Visit

The patient was seen today for follow up and management of the patient's wound(s)

Information Source:

Caregiver

Chart

HPI Description

10/21/2025 INITIAL: The patient is an 85-year-old male with a significant past medical history of atrial fibrillation (AFib), coronary artery disease (CAD), type 2 diabetes mellitus (DM2), hyperlipidemia, hypertension (HTN), hypothyroidism, prostate cancer, constipation, squamous cell carcinoma of the mouth and tongue with metastatic disease, congestive heart failure (CHF), and dilated cardiomyopathy. The patient was referred to the SILVER PINE HEALTH ALLIANCE for evaluation and management of a Stage 3 sacral pressure ulcer.

Allergies: NKDA

Current

Medications: Alprazolam, Dapagliflozin, Diltiazem, Famotidine, Oxycodone, Hydromorphone, Megestrol, Nitroglycerin, Senna, Apixcan, NovoLog (insulin aspart), Rosuvastatin, Tamsulosin, Vitamin B1 (Thiamine)

Preferred Pharmacy:

Bluewater Wound Care

6330 Maplewood Way

Jacksonville

Phone: (561) 555-0124

10/28/2025: The wound shows significant improvement compared previous assessment. The patient reported pain 8/10 and refused to allow SILVER PINE HEALTH ALLIANCE Clinician to perform debridement. The patient is educated to the importance of offloading and to changing position frequently (every 2 hours) to promote healing and increase circulation.
