Chief Complaint & HPI

Reason for Visit

The patient was seen today for follow up and management of the patient's wound(s)

Information Source:

Caregiver

Chart

HPI Description

07/22/2026 INITIAL: The patient is an 85-year-old male with a significant past medical history of atrial fibrillation (AFib), coronary artery disease (CAD), type 2 diabetes mellitus (DM2), hyperlipidemia, hypertension (HTN), hypothyroidism, prostate cancer, constipation, squamous cell carcinoma of the mouth and tongue with metastatic disease, congestive heart failure (CHF), and dilated cardiomyopathy. The patient was referred to the WCW for evaluation and management of a Stage 3 sacral pressure ulcer.

Allergies: NKDA

Current

Medications: Alprazolam, Dapagliflozin, Diltiazem, Famotidine, Oxycodone, Hydromorphone, Megestrol, Nitroglycerin, Senna, Apixaban, NovoLog (insulin aspart), Rosuvastatin, Tamsulosin, Vitamin B1 (Thiamine)

Preferred Pharmacy:

CVS Pharmacy #3520

6202 US Highway 41 North

Apollo Beach, FL 33572

Phone: (813) 645-4605

07/29/2026: The wound shows significant improvement compared previous assessment. The patient reported pain 8/10 and refused to allow WCW Clinician to perform debridement. The patient is educated to the importance of offloading and to changing position frequently (every 2 hours) to promote healing and increase circulation.
