Reason for Consult

ischial wounds

Chief Complaint

establish care

HPI / Subjective

27-year-old male admitted to the hospital by ambulance. patient states he was a pedestrian struck by a car about a year ago at which point he was left paraplegic. States he had been doing okay but has been having some social issues that he's trying to resolved. About a week ago he was in a hospital at which point he had wounds of his ischium that was debrided. It's unclear what happened but he left the hospital and was admitted to our facility.

Past Medical History

pressure ulcer injury repair
foley cath
Chronic paraplegia, mid waist

Recommendations

27-year-old male with bilateral lesions due to paraplegia on pressure

- the patient recently had debridement per his report. The wounds do look clean and do not require any further surgical intervention.
- Wound care orders placed
- case management we will discuss with the patient about placement and post hospitalization care.

Electronically signed by PAPOIAN VARDAN MD on Jul-10-2026 1114
